TECHNICAL SKILLS

Programming Languages: Python, Java, C++, SQL, JavaScript (basics)

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, OpenCV, Kivy

Tools & Technologies: Git, Docker, YOLO (v7/v8)

Core CS Concepts: OOP, Data Structures & Algorithms, Machine Learning, Computer Vision

Soft Skills: Analytical Thinking, Problem Solving, Independent Contributor, Fast Learner, Good Communication

PROJECTS

Text to Handwriting App *Python | TensorFlow | OpenCV | Kivy | GitHub*

- Designed and independently coded a full ML application that converts text into realistic, personalized handwriting using deep learning — demonstrating end-to-end product development skills.
- Implemented modular, debuggable Python code with configurable options (ink color, paper textures, font weights), following OOP principles for maintainability.
- Built export functionality supporting PDF and JPEG output; debugged model inference pipeline to ensure high-resolution, print-quality results.

Smart Device Object Detection *Python | YOLO v7/v8 | Deep Learning | GitHub*

- Independently built and curated a custom dataset of 5,000+ labeled images of smart devices (laptops, tablets, smartwatches) — demonstrating initiative and strong data engineering skills.
- Coded the full training pipeline using YOLO v7/v8; applied logical debugging to fine-tune model parameters and achieve real-time detection accuracy.
- Applied strong DS&A and OOP principles throughout — structured the pipeline for reusability and clear separation of concerns.
- Demonstrated practical applications in inventory management and security surveillance — directly aligned to product problem-solving.

EDUCATION

B.Tech – CS & Engineering (AI & ML) | Vellore Institute Of Technology *Sep 2023 – Expected May 2027*

CGPA: 8.92/10 | Relevant coursework: Data Structures, Algorithms, OOPs(Python), Machine Learning

Class XII — 93.2%

H.P.D. S.B.V.M., Mathura, UP | 2022

Class X — 95.2%

H.P.D. S.B.V.M., Mathura, UP | 2020

CERTIFICATIONS & INTERNSHIPS

- IIT Bombay- Summer Fellowship May-July 2026 under FOSSEE project
- NPTEL – Internet of Things | Top 2% nationwide
- Salesforce Virtual Internship (8 weeks) – Developer Fundamentals & Agentblazer: hands-on coding tasks aligned with product development responsibilities.
- AICTE / Shell India / Edunet – AI & Data Analytics (Skills4Future): applied AI to real-world sustainability problems, reinforcing independent problem-solving.
- Coursera- completed Course on Applied machine learning course
- Certified in Data Analytics By google
- Contributing in Open source- GSSOC 2026
